WATERLOO: NEW PERSPECTIVES: THE GREAT BATTLE REAPPRAISED

Wiley, 1994. Book Condition: New. Brand New, Unread Copy in Perfect Condition. A+ Customer Service! Summary: Waterloo: 18 June 1815: one of the greatest and most studied battles in history, now remarkably reassessed to reveal new intrigue, mystery, deceit, lies and error compounded over 175 years. How can this be so and for this book to claim such unique qualities when the event took place so long ago and is the subject of thousands of books? It is possible to make such a claim, and justifiably so. Waterloo had so many political and military implications that barely had the smoke of battle cleared than historians were examining every detail of the conflict. Prominent among these was Captain William Siborne who, while not at the battle, decided to create the definitive model of it. He thus obtained many hundreds of first-hand accounts of the action and movements on the day from the regiments involved. From that moment on, this "official" model became fatally corrupted. Those providing funds could also ensure their presence on the model and in any position desired, accurate, corroborated or otherwise. When the Siborne letters were published, only 180 were used. Unsurprisingly, they were only those supporting the positions of the troops on the model as laid out by Siborne, those funding Siborne and - worse yet - only from British officers, thus creating a fantastic historical fake. From the mid-nineteenth century to date, scholars have written theses and detailed studies, and built reputations on the basis of the dubious and imbalanced published letters. Although all remaining Siborne letters have long been open to study, no one until now has undertaken the comparative work required to provide the...
