## HYDRAULICS: WITH WORKING TABLES (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Hydraulics: With Working Tables In this edition the book has been brought thoroughly up to date and subjected to careful and drastic revision. The chief object is, as before, to deal thoroughly with the facts, laws, and principles of Hydraulics, and to keep always in view their practical aspects. The enormous waste caused by the use of erroneous co-efficients is known to all. Another important object is to remedy this. The use of old and inaccurate figures, - as some recent papers show - is not uncommon. Fresh discussions on all the most important coefficients are now given and specific recommendations are made. A new set of co-efficients for pipes is given. Numerous examples of practical problems are included, and full sets of tables for working them out. The large quantity of new and original matter which - as some reviewers were good enough to say - characterised the previous editions is reproduced in an improved form, and fresh matter has been added on weirs and weir-like conditions, on discharge measurement by means of pipe diaphragms, on standing waves and the practical use now being made of them in America, and on the laws governing silting and scour. The difficult question of the surface curve - upstream of weirs, etc. - is made clearer, and a simple method of procedure, applicable to a vast number of cases and avoiding the use of the erroneous backwater function, is put forward. Some remarks are made on the best practical forms for the chief formulae, and also some remarks - much needed - on the practice of basing formulae on certain selected experiments while rejecting others which are...
