

Computing Projects in Visual Basic.NET

By Derek Christopher

Pearson Education Limited, United Kingdom, 2003. Paperback. Book Condition: New. 276 x 216 mm. Language: English . Brand New Book. Computing Projects In Visual Basic. NET is ideal for AS/A level Computing, A level ICT and Advanced VCE ICT students. The text assumes no starting knowledge of programming and covers everything needed to write a large program, which makes this a great text for Students on other courses, such as BTEC National, and first year HND and degree courses, as well as personal and professional readers. For AS/A level Computing - depending on the Examining Board computing students may need to produce a small project or write a number of programs for the AS part of the course. For A level a substantial piece of programming may be needed. The theory part of the course covers a number of important programming concepts, which are far better learned through practical programming than only through the pages of a textbook. Visual Basic is an excellent, modern language through which to learn these concepts. For AVCE students - an optional unit on programming using an event-driven language such as Visual Basic is offered by all the Boards. One of the Boards offers two...
